

No. of Functional Features Included in the Solution

Date	26 September 2026
Team ID	SWTID-2026-3976
Project Name	AI FAQ Assistant API
Maximum Marks	4 Marks

Functional Features Delivered

S.No	Feature	Description	Endpoint(s)
1	Secure User Authentication	Register and log in with bcrypt-hashed passwords and JWT issuance	POST /api/auth/register , /login
2	Authenticated Profile Retrieval	Fetch the logged-in user's own profile via the Bearer token	GET /api/auth/profile
3	FAQ Creation & Ownership	Create a new FAQ tied to the authenticated creator, validated against the category enum	POST /api/faqs
4	FAQ Listing, Retrieval, Update & Deletion	List all FAQs, fetch one by ID, and update/delete an FAQ (protected)	GET /api/faqs , /:id , PUT /:id , DELETE /:id
5	Keyword FAQ Search	Public keyword search across existing FAQs, routed ahead of the /:id route to avoid conflicts	GET /api/faqs/search?q=...
6	AI Direct-Answer Generation	Google Gemini answers a free-form question when no FAQ match exists yet	POST /api/ai/answer
7	AI FAQ-Pair Generation	Google Gemini drafts a question/answer pair from a single topic string	POST /api/ai/generate-faq
8	Centralized Error Handling	Consistent structured JSON error responses for duplicate-key, validation and invalid-ID errors, and any status code set upstream (e.g. by the Gemini SDK)	Applies across all routes

8 functional features delivered within the 15–29 September 2026 cycle. Category management is delivered as a validated enum field on FAQ rather than a separate Category CRUD surface, and there is no admin-only route group in this cycle – both are recorded as Scalability & Future Plan items (see Phase 8).
