

Brainstorming & Idea Prioritization

Date	15 September 2026
Team ID	SWTID-2026-3976
Project Name	AI FAQ Assistant API
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member listed ideas independently during the kickoff session on 15 September 2026, before grouping and rating them.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	V. Sabarivasan	A centralized, secure backend that wraps FAQ creation, storage and retrieval behind JWT-authenticated routes instead of scattered manual documentation	Backend / Security	1
2	V. Sabarivasan	Internal permission layers so only the original author of an FAQ can edit or delete it, while everyone can read published FAQs	Backend / Security	1
3	Yogeshkumar N	Store every FAQ as a structured MongoDB document (question, answer, category) via Mongoose so entries stay consistent and queryable	Data Modeling	1
4	Karthika D	Use Google Gemini to auto-generate an FAQ question/answer pair from just a topic, instead of writing every entry by hand	Generative AI	1
5	Karthika D	Use Google Gemini to answer a support query directly, for cases where no matching FAQ exists yet	Generative AI	1
6	Uma Sankari G	Keyword/semantic search over existing FAQs so support staff and customers can find an answer without browsing the whole list	Search	1
7	Uma Sankari G	Group FAQs into categories (Technology, Education, Health, Banking, General) for easier navigation	Data Modeling	1
8	Vishal Frankline L	Centralized error handling so malformed input, duplicate emails and invalid IDs all return consistent, predictable JSON errors	Backend / Reliability	1
9	Vishal Frankline L	A future tagging and like/feedback layer so customers can flag which FAQs actually helped them, beyond simple categories	Future Scope	2

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility	Importance	Priority	Selected (Yes/No)
1	AI FAQ Assistant – a secure REST backend that stores FAQs by category, lets authenticated creators manage their own entries, and uses Google Gemini to answer queries and auto-draft new FAQ pairs	High	High	High	Yes
2	Tagging, like counts and per-answer feedback collection on top of the core FAQ model	Medium	Medium	Medium	No – deferred to future roadmap (see Scalability & Future Plan)

Group 1 was selected as the team's final idea for the 15–29 September 2026 build cycle because it directly matched the team's strongest skills (Node.js/Express backend, MongoDB/Mongoose, and Generative AI integration) with a problem every team member had personally seen in support-heavy roles – repetitive queries with no fast, organized way to answer them.
