Project Name	AI FAQ Assistant API
Maximum Marks	2 Marks

Customer Journey Map

Mapped for Priya's end-to-end journey through the AI FAQ Assistant, from account setup to publishing an AI-assisted FAQ.

Phase of Journey	Stage 1: Account Setup	Stage 2: Draft & Publish an FAQ	Stage 3: Resolve a Customer Query
Actions What does the customer do?	Registers/logs in; receives a JWT to use on subsequent requests	Asks Gemini to generate an FAQ pair from a topic, or writes one directly, and saves it under a category	Searches existing FAQs by keyword, or asks the AI answer endpoint directly when nothing matches yet
Touchpoint What part of the service do they interact with?	POST /api/auth/register , POST /api/auth/login , GET /api/auth/profile	POST /api/ai/generate-faq (Google Gemini), POST /api/faqs	GET /api/faqs/search?q=... , POST /api/ai/answer (Google Gemini)
Customer Thought What is the customer thinking?	"I hope my account and my FAQ entries stay tied to me."	"This just wrote a usable draft from one topic string."	"This is answering in seconds what used to take a manual lookup."
Customer Feeling What is the customer feeling?	Cautiously optimistic	Relieved and productive	Confident and unblocked
Process Ownership Who is in the lead on this?	Auth Controller & Middleware – V. Sabarivasan, Vishal Frankline L	FAQ Controller & AI Controller – Uma Sankari G, Karthika D	AI Service (Gemini) & FAQ search – Karthika D, Yogeshkumar N
Opportunities How can we improve this stage?	Add email verification on registration	Normalize category into its own collection instead of a fixed enum on FAQ	Move from keyword search to true vector/semantic search over FAQ embeddings
