## Problem-Solution Fit

|                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CUSTOMER SEGMENT(S)</b> <ul style="list-style-type: none"><li>Customer support teams and knowledge-base owners handling a repetitive inquiry backlog</li><li>Persona: Priya – a support operations manager balancing FAQ upkeep with day-to-day query resolution</li></ul>                           | <b>PROBLEM</b> <ul style="list-style-type: none"><li>FAQ content is hard to keep organized, categorized and current</li><li>Manual drafting of answers and searching for existing ones is slow and repetitive</li><li>No unified permission layer protects an author's FAQ from being changed by someone else</li></ul> |
| <b>EXISTING ALTERNATIVES</b> <ul style="list-style-type: none"><li>Manually writing and filing FAQ entries in shared documents or spreadsheets</li><li>Generic keyword search with no ownership or category structure behind it</li></ul>                                                               | <b>SOLUTION</b> <ul style="list-style-type: none"><li>Secure, JWT-authenticated backend for creating, categorizing and searching FAQs</li><li>Google Gemini-powered direct answers and FAQ-pair generation from a single topic</li></ul>                                                                                |
| <b>FIT VALIDATION</b> <p>— The solution directly answers the problem: a structured, ownership-checked FAQ collection replaces scattered documents, keyword search replaces manual lookup, and the two Gemini-backed endpoints replace hand-drafting both one-off answers and brand-new FAQ entries.</p> |                                                                                                                                                                                                                                                                                                                         |
