

Demonstration of Proposed Features

Date	29 September 2026
Team ID	SWTID-2026-3976
Project Name	AI FAQ Assistant API
Maximum Marks	3 Marks

Demonstration of Proposed Features

Feature Proposed (Brainstorming)	Delivered?	Demonstrated Via
Centralized, secure backend replacing scattered manual FAQ documentation	Yes	JWT-authenticated register/login/profile with MongoDB storage
Internal permission layer so only an FAQ's author can edit or delete it	Partially	<code>protect</code> middleware gates every write route; ownership is recorded via <code>createdBy</code> , and a per-request authorship check is recorded as a roadmap refinement (see Scalability & Future Plan)
FAQs stored as structured, categorized MongoDB documents	Yes	FAQ model with a validated <code>category</code> enum (Technology/Education/Health/Banking/General)
AI-generated FAQ pair from a topic	Yes	<code>POST /api/ai/generate-faq</code> via Google Gemini
AI direct-answer generation for un-catalogued questions	Yes	<code>POST /api/ai/answer</code> via Google Gemini
Keyword search across FAQs	Yes	<code>GET /api/faqs/search?q=...</code>
Centralized error handling for malformed input, duplicate emails and bad IDs	Yes	<code>errorMiddleware.js</code> classifying Mongoose duplicate-key, validation and cast errors
Tagging, like counts and per-answer feedback	Deferred	Recorded as future roadmap (see Scalability & Future Plan)
